

Global Alert and Response (GAR)

Situation reports with epidemiological data: archive

WHO provides regular situation reports on the *Ebola response roadmap*. They contain a review of the epidemiological situation and an assessment of the response measured against the core *Roadmap* indicators where available.

Updates are provided for the following countries: those with widespread and intense transmission; those with or that have had an initial case or cases, or with localized transmission; those countries that neighbour or have strong trade ties with areas of active transmission.
