US consumer prices declined in February alongside plunging gasoline but underlying inflation advanced more than expected, a government report released on Wednesday, March 16, shows. Costs climbed for a broad section of goods and services to include big ticket items like shelter and medical care.

The US Inflation Calculator measures the buying power of the dollar over time. Just enter any two dates between 1913 and 2016, an amount, and click 'Calculate'.

**Inflation Calculator**

If in 2003 (enter year)

I purchased an item for $ 1.00

then in 2016 (enter year)

that same **item would cost:** $1.29

Cumulative rate of inflation: **28.9%**
