	Study cannot be conducted in this country
	Documentation for Central Asia listed here
	Documentation for regional PASMO studies listed here

<b>INDICATOR INFORMATION</b>
------------------------------

<b>Effectiveness: Any Target Behavior</b>	Proportion of countries with evidence of PSI impact with regard to any target behavior in a PSI health area, based on monitoring, evaluation, and impact tables.
<b>PERForMance Indicators 2008, 2009</b>	Proportion of TRaC studies for which the PERForMance Review has been computed on key indicators (e.g. primary abstinence, secondary abstinence, use of modern contraception, ownership of bednets/ITNs). Calculated separately for 2008 and 2009.
<b>Concentration Index 2008, 2009</b>	Proportion of TRaC studies for which the concentration index has been computed. TRaC studies must contain SES indicators for this calculation. Calculated separately for 2008 and 2009.
<b>BCC DALYs</b>	<p><b>Definition:</b> Number of PSI countries which conduct behavior communication campaign to prevent HIV transmission through heterosexual, homosexual or injection drug use that have provided evidence of desired change in behaviors of interest (i.e., being abstinent, number of sexual partner, number of sexual contacts, condom use, needle/syringe sharing, initiation of injection, etc.) as a result of PSI intervention based on pre- and post-intervention TRaC data.</p> <p><b>Requires:</b> 1. two rounds of TRaC data; 2. suggested DALYs questions collected in at least one round; 3. a brief description of the intervention, including purpose of the intervention, target population, behavior of interest, intervention approach and activities, and time period of intervention; 4. suggestion on which questions to use for creating exposure variable; 5. evaluation and impact table; 6. estimate of target population.</p>
<b>MAP (last 2 years)</b>	<p><b>Minimum Standard:</b> "All platforms delivering products will conduct a MAP survey at least every two years." <b>Definition:</b> Proportion of countries that have conducted a MAP study since the beginning of 2007 for products that constitute 70% of DALY output (excluding free ITN/LLIN) delivered by the platforms.</p>
<b>Targeting DALYs (last 3 years)</b>	<p><b>Minimum Standard:</b> All major multi-year interventions for which "targeting" information is useful for the DALY calculator must supply that information at least every three years. <b>Definition:</b> Proportion of PSI countries that sell/distribute condoms that have submitted collected targeting data and confirmed by the Metrics team in DC.</p> <p><b>Requires:</b> <u>For general population TRaCs:</u> 1) cleaned SPSS dataset; 2) questionnaire; 3) study design. <u>For high-risk TRaCs:</u> 1-3 plus proportion of condoms distributed to the high-risk group from MIS. <u>For general population and high-risk TRaCs:</u> 1-3 plus an estimate of the proportion of the general population that is high risk and a citation for source of this data.</p>
<b>TRaC (major interventions)</b>	<p><b>Minimum Standard:</b> All major multi-year interventions (any combination of behavior and target group) from 2009 onward will be monitored at a minimum by a baseline and endline TRaC in the appropriate year. <b>Definition:</b> Proportion of interventions in 2009 for which a baseline and endline TRaC was conducted in the appropriate year.</p>

<b>Annual research plan</b>	Proportion of countries that have an annual research plan for the current year uploaded to the PSI website.
<b>Documentation: 2005-2008</b>	Proportion of TRaC studies from 2005 to 2008 with a TRaC summary report on the website and complete documentation in the PSI/Washington Research MIS. <b>Requires:</b> study design, questionnaire, data and syntax, and a final TRaC Summary Report posted to the Research and Metrics website.
<b>Documentation: 2009</b>	Proportion of TRaC, MAP, and FoQus studies with required documentation on file in DC. <b>TRaC:</b> study design w/budget, questionnaire, data, syntax, TRaC Summary Report w/impact table. <b>MAP:</b> study design w/budget, data, audit form, MAP Summary Report. <b>FoQus for Marketing Planning:</b> study design w/ budget, reduced data, visual output, dashboards, category map. <b>FoQus for Qualitative Segmentation:</b> study design w/budget, reduced data, visual output, dashboards, category map, qualitative segmentation diagram(s). <b>FoQus for TRaC Improvement (Scales):</b> study design including the interview guide and budget; coding dictionary; coded qualitative data; compiled data and syntax with summary statements; final scale items with definitions.
<b>FoQus for Marketing Planning/ Qualitative /Segmentation coverage</b>	Proportion of PSI countries which have ever completed a FoQus for Marketing Planning or FoQus for Qualitative Segmentation study.
<b>FoQus for TRaC Improvement/Qualitative Segmentation coverage</b>	Proportion of PSI countries which have ever completed a FoQus for TRaC Improvement study (can be combined with either a FoQus for Marketing Planning or FoQus for Qualitative Segmentation study).
<b>MAP: phase two coverage</b>	Proportion of PSI countries which have conducted a MAP Phase Two study (a MAP study that includes GIS and measures of access).
<b>MAP: phase three coverage</b>	Proportion of PSI countries which have conducted a MAP Phase Three study (a MAP study conducted in conjunction with a TRaC or FoQus study to obtain objective measures of access).
<b>TRaC-M or other Monitoring Activity</b>	Proportion of PSI countries which have conducted a TRaC-M study or any other monitoring between rounds of TRaC.
<b>Dashboard to Decision Making</b>	Proportion of TRaC studies within a country for which a Dashboard-to-Decision-Making session has been completed and required documentation has been submitted.

---

**Modifications to this month's scorecard**

1. Documentation demoninators for 2009 have been updated, and those for 2010 have been added.
2. Performance Review and Concentration Index demonimators have been updated and will continue to be updated as research plans change.

\*R&M New Initiatives are methods and processes that the R&M Department is launching to simplify or improve current research practices. They are recommended, but not required. Please work with your Regional Researcher to determine when and where these studies are appropriate.
