

Tanzania

- SDI contributed to a sharpened focus on incentives and accountability
- 2011: SDI results were presented at a closed Cabinet meeting: Minister of Education starts doing unannounced visits to schools and confirms SDI's findings
- April 2013: Presidential initiatives use SDI data as diagnostics during planning for major reforms: **Reform Compact** and **Big Results Now!**
- April 2013: SDI data cited in blogs (see screenshots below;
<https://dfid.blog.gov.uk/2013/03/19/big-fast-accountable-results-now-mr-president/>)
- June 2014: SDI indicators feed into and use to track performance of Government of Tanzania and World Bank/ project valued \$122 million.

Will it work or fizzle away to pipe dreams? Well the sceptic in me was pleased to see the right issues being raised and some promising solutions proposed. Teacher motivation is very low and leads to average teacher attendance rates of only 50% as a recent survey showed, no wonder student exam results have plummeted. Both the President and the PEMANDU CEO welcomed low cost accountability measures (Tanzania has joined the Open Government Partnership let them truly lead and

Big, fast, accountable results now, Mr President!

Tanzanian President as we greeted him to the education lab, President!"
