**CARE's** Haiti emergency response is monitored by a special advisory committee of senior managers and experts from **CARE** member countries that provide major funding. Each member has skills in a particular area (emergency response, program quality, finance, shelter, etc.). The committee meets regularly and visits Haiti twice a year to monitor progress, ensure goals are being met, review expenditure reports and identify areas where additional support or improvements are needed. **CARE's** operations and financial expenditures are also regularly reviewed by its independent auditors.
