Introduction

GiveWell is dedicated to finding outstanding giving opportunities and publishing the full details of our analysis to help donors decide where to give. Our giving funds allow donors to contribute to the most impactful grant opportunities our researchers have identified.

In this report, we describe what we know about our funds raised, funds directed, operational expenses, and donors, during metrics year 2023.¹ The table below describes our financial performance in 2022 and 2023.

	2022	2023	Y/Y Growth
Funds Raised	\$602,889,435	\$355,070,034	-41%
Funds Directed ²	\$439,391,295	\$216,305,835	-51%

Donations generally remained steady, with donors other than Open Philanthropy giving around \$255 million in 2023 compared to around \$253 million in 2022. We received less funding from Open Philanthropy than we had in the last two years, which resulted in lower overall funds raised than in 2022; see below for information on the [sources](#) of our funding and on [funds raised](#). We also directed substantially less funding in 2023 than we did in 2022; see below for information on [funds directed](#) and this [blog post](#) for more on GiveWell's approach to aligning cash flow with funds directed over time.

Funds raised

Overview

Our total funds raised were lower in 2023 than in during 2021 or 2022; this decrease is primarily a result of decreased funding from Open Philanthropy (see [below](#) for more).³

¹ GiveWell's 2023 metrics year ran from February 1, 2023, through January 31, 2024.

² In 2023, we raised more funds than we directed. For more, see the [section on funds directed](#).

³ Note that the chart refers to our historical funds raised. The figures for 2020 and earlier refer to "money moved," which we are no longer reporting. Though similar, these two metrics are not directly comparable (see [glossary](#)).

Most donors who give via GiveWell rely on GiveWell to allocate their donation rather than choosing to restrict their donation to a particular organization. In 2023, GiveWell recommended allocations for 90% of the donations we raised, compared to 91% in 2022 and 86% in 2021. We identify these donations as *GiveWell-recommended funds*.⁴

Category	Amount	% of Total
GiveWell-recommended funds	\$319,202,416	90%
Top Charities Fund donations	\$93,834,608	26%
All Grants Fund donations	\$30,256,052	9%
Unrestricted funds	\$70,739,619	20%
Funds from Open Philanthropy	\$100,000,000	28%
Other GiveWell-recommended funds ⁵	\$24,372,137	7%
Donor-designated funds	\$35,867,618	10%
Total	\$355,070,034	100%

Our Giving Funds

All Grants Fund

In [August 2022](#), we launched the [All Grants Fund](#), and it was our [top recommendation](#) for end-of-year giving in 2022 and one of our [top two recommendations](#) for 2023. The fund, which makes grants on a rolling basis, allows donors to contribute to the most impactful grant opportunities we've identified. The All Grants Fund provides grants to our Top Charities as well as grants to incubate newer programs, promote policy change, fund relevant research, or support other potentially high-impact, cost-effective initiatives that don't fit neat categorization.

The All Grants Fund supports the highest-impact opportunities we can identify in global health and development. We recommend the All Grants Fund to donors who wish to support

⁴ GiveWell-allocated funds include:

- donations to the [Top Charities Fund](#), which we allocate quarterly to the highest priority funding needs among our [Top Charities](#).
- donations to the [All Grants Fund](#), which we allocate to any grant that meets our cost-effectiveness bar, including funding opportunities outside our Top Charities.
- donations to our [Unrestricted Fund](#), which can be allocated to any GiveWell priority, including grantmaking and our own operating expenses.
- grants we recommend that other funders make. The vast majority of this comes from Open Philanthropy (see [here](#)), which generally disburses funding directly to the organizations we recommend. Note, however, that Open Philanthropy retains the discretion to approve or reject grants. We also recommend grants to other funders, such as the [EA Global Health and Development Fund](#) and groups that operate funds similar to our Top Charities Fund and seek our input on donation allocations from those funds.

This category excludes donations to Top Charities (either through us or directly to the organization) that are not based on a specific recommendation from us directly to the donor.

⁵ This includes donations to All Grants Fund and Top Charities Fund equivalents (such as funds created by charity aggregators who rely on our research and recommendations), as well as donations for specific grants.

a wide range of grantmaking, including funding opportunities more uncertain or riskier than our Top Charities. Donors contributed more than \$30 million to the fund during 2023, about the same as in 2022.

Top Charities Fund

Our [Top Charities Fund](#) supports our four [Top Charities](#). We commit grants quarterly to the highest priority funding needs at the time, taking into consideration funding gaps, plans for additional funding, and the cost-effectiveness of the funding gaps.⁶ Donors contributed more than \$93 million to the fund during 2023, slightly more than in 2022.

Unrestricted Fund

Donations to our [Unrestricted Fund](#) can be used for any GiveWell priority, including grantmaking and our own operating expenses. We raised about \$71 million in unrestricted funding in 2023, which was substantially more than our [operating expenses](#) of around \$19 million. Per our ["excess assets" policy](#), we grant out unrestricted funds that exceed the amount we think we could productively use. Additionally, we sometimes receive large unrestricted donations that exceed the 20% cap we place on operations support from any single donor, and in those cases we may choose to grant out the excess funds or to reserve some portion of that donation to fund 20% of our operations in a future year. For more on our excess assets policy and single donor cap, see this [blog post](#).

Sources of funds raised

Individual donors provided around \$229 million (64% of total funds raised), most of which was processed by GiveWell.⁷ The largest single source of funding to GiveWell-recommended organizations is [Open Philanthropy](#), which provided \$100 million (28%) of our funds raised in 2023, most of which was or will be provided directly to organizations at GiveWell's recommendation rather than processed by GiveWell.⁸ Charity aggregators who rely on our research and recommendations were also a source of GiveWell funding; they contributed \$26 million (7%), most of which was provided directly to organizations.⁹

⁶ We currently make grants quarterly; during some previous periods, we made grants from the Top Charities Fund on a rolling basis.

⁷ About \$211 million from individual donors was processed by GiveWell; about \$18 million was provided directly to charities. "Individual donors" includes donors such as family foundations; it does not include charity aggregators or Open Philanthropy.

⁸ This figure includes about \$1.8 million in funding to support GiveWell operations, which is listed in the table as Donations through GiveWell. This operational funding was not necessarily all spent in 2023. The remainder of Open Philanthropy's funding, with the exception of one grant for about \$3.7 million which flowed through GiveWell, is categorized in the table as Direct to Charity. Open Philanthropy's Direct to Charity funding has only funded grants that we specifically request it support.

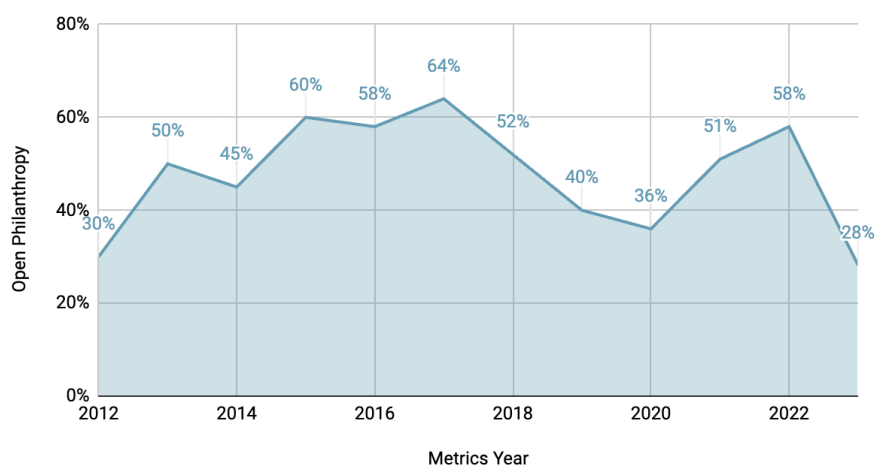

⁹ This includes a number of Effective Altruism groups. About \$3 million from these organizations was processed by GiveWell; about \$23 million was provided directly to charities.

2023 Funds Raised by Category	Total Raised	Portion of Total
Donations through GiveWell	\$219,361,965	62%
Open Philanthropy	\$5,473,296	2%
Charity aggregators	\$2,975,069	1%
Individual donors	\$210,913,600	59%
Direct to Charity	\$135,708,069	38%
Open Philanthropy	\$94,526,704	27%
Charity aggregators	\$23,420,727	7%
Individual donors ¹⁰	\$17,760,638	5%
Total	\$355,070,034	100%

Funding from Open Philanthropy

Historically, Open Philanthropy has been the largest single donor to GiveWell-recommended funds. In October 2023, Open Philanthropy announced that it planned to give [\\$300 million](#) for GiveWell to spend from 2023 through 2025; we allocated \$100 million of that total for 2023. The amount for 2023 is substantially less than Open Philanthropy gave in 2021 (\$300 million) or 2022 (\$350 million).¹¹ This decrease in Open Philanthropy funding of \$250 million between 2022 and 2023 accounts for the decrease in funds raised between 2022 and 2023, which totaled \$248 million.

Open Philanthropy Funding as a % of Funds Raised

¹⁰ Note that the information we have about individual donors' direct-to-charity donations is less granular and lower quality than our data on donations through GiveWell. For more information on our data sources for direct-to-charity donations, see the entry in our [glossary](#).

¹¹ The \$100 million per year is a return to 2020 levels, from which 2021 and 2022 were significant increases.

Funds directed

In 2023, we directed around \$197 million to the organizations we recommend, and spent an additional \$19 million on our operations. This represents a decrease of 51% in funds directed compared to 2022 (in comparison to a decrease of 41% in funds raised between 2022 and 2023).

2023 Funds Directed by Category	2022	2023	Year/Year Growth
Funds directed to organizations	\$425,224,570	\$197,474,318	-54%
Funding directed to Top Charities ¹²	\$342,811,054	\$102,162,580	-70%
Funding directed to other programs	\$82,413,516	\$95,311,739	16%
GiveWell's operations	\$14,166,724	\$18,831,517	33%
Total	\$439,391,294	\$216,305,835	-51%

We directed about \$139 million less in 2023 than we raised in 2023.¹³ We wrote about our new approach to fiscal planning in [this blog post](#), which explains GiveWell's approach to making cost-effective grants in a context where the amount of funds we raise each year varies.

Funds directed to Top Charities

Of the funds we directed to organizations in 2023, 52% went to our four Top Charities, with \$32 million (16% of the total directed to organizations) going to Against Malaria Foundation for insecticide-treated nets to prevent malaria, \$27 million (14%) to Malaria Consortium for its seasonal malaria chemoprevention program (SMC), \$25 million (13%) to New Incentives for its program of conditional cash transfers to promote immunization (CCTs), and \$18 million (9%) to Helen Keller International for its vitamin A supplementation program (VAS).

This includes funds allocated from the Top Charities Fund, funds allocated from the All Grants Fund, and funds from other donors. You can see a full breakdown of the funds we directed by organization and program in our [accompanying spreadsheet](#). Tables for funds

¹² As a result of changing the criteria for Top Charities in August 2022, the 2022 Metrics Report included funds directed to former Top Charities in the total for Top Charities. This year, we've moved funds directed to these former Top Charities (which totaled \$7,267,818 in 2023) into "Funding directed to other programs."

¹³ Funds raised in 2023 but not directed in 2023 include:

- Donations that will be used for grantmaking in future years (see this [blog post](#) for more information about our approach).
- "Contingency funds" committed to charities under particular grant agreements but only paid out under certain conditions of the grant. (If those conditions are not met, we reallocate the funding to other opportunities.)
- Unrestricted funds raised in metrics year 2023 but not spent on operations that year (these appear as funds directed in the year they are allocated).

directed by organization and program are also available in the [appendix](#) to this report. For a list of grants to Top Charities supported by our Giving Funds, see [this page](#).¹⁴

Funds Directed to Top Charities Including Source of Funding				
Organization + Program	Open Philanthropy	Other Donors	Total	%
Against Malaria Foundation - ITNs	\$0	\$32,323,614	\$32,323,614	32%
Malaria Consortium - SMC	\$0	\$27,155,899	\$27,155,899	27%
New Incentives - CCTs for immunization	\$0	\$24,748,486	\$24,748,486	24%
Helen Keller International - VAS	\$0	\$17,934,581	\$17,934,581	18%
Grand Total	\$0	\$102,162,580	\$102,162,580	100%

Funds directed to other organizations and programs

In 2023, GiveWell directed more than \$95 million (48% of funding directed to organizations) to organizations and programs other than our current Top Charities. This includes grants to incubate newer programs, promote policy change, fund relevant research, or support other potentially high-impact cost-effective initiatives that don't fit neat categorization; it also includes approximately \$7 million directed to former Top Charities. Below is a list of our grantmaking to other organizations and former Top Charities in 2023. You can also see a full list of GiveWell grants in the [appendix](#) of this report and on [this page](#).¹⁵

¹⁴ The database can be filtered by funder, which includes Top Charities Fund, All Grants Fund, and GiveWell unrestricted funding. Note that funding directed to Top Charities also includes donor-designated funds, which are not listed among our grants.

¹⁵ The database can be filtered by funder, which includes Top Charities Fund, All Grants Fund, and GiveWell unrestricted funding.

Funds directed to other organizations and programs including source of funding				
Organization + Program	Open Philanthropy	Other Donors	Total	%
Other organizations and programs	\$56,716,358	\$31,327,563	\$88,603,921	92%
Clinton Health Access Initiative - ORS/Zinc	\$0	\$7,773,651	\$7,773,651	8%
Evidence Action - IFA coverage surveys	\$0	\$97,000	\$97,000	0%
Evidence Action - in-line chlorination India	\$37,623,540	\$2,209,970	\$39,833,510	42%
Evidence Action - safe water scoping	\$4,616,003	\$1,773,040	\$6,389,043	7%
IRD Global - extension of mCCT & EIR	\$0	\$2,712,552	\$2,712,552	3%
IRD Global - org. development support	\$5,399,805	\$0	\$5,399,805	6%
IRD Global - zero TB program exit	\$0	\$736,000	\$736,000	1%
IRC - acute malnutrition treatment	\$7,485,323	\$0	\$7,485,323	8%
Malaria Consortium - codelivery VAS & SMC	\$0	\$1,440,000	\$1,440,000	2%
Nutrition International - VAS	\$0	\$5,977,851	\$5,977,851	6%
One Acre Fund - top-up for RCT	\$0	\$185,199	\$185,199	0%
PATH - bridge grant for malaria vaccine TA	\$0	\$838,000	\$838,000	1%
PATH - study of PMC + RTS,S	\$1,591,687	\$0	\$1,591,687	2%

Other	\$0	\$4,279,221	\$4,279,221	4%
Former Top Charities	\$0	\$7,267,818	\$7,267,818	8%
Unlimit Health - Deworming	\$0	\$1,495,745	\$1,495,745	2%
Sightsavers - Deworming	\$0	\$5,772,073	\$5,772,073	6%
Grand Total	\$56,716,358	\$38,595,381	\$95,311,739	100%

Funds directed from Open Philanthropy

In 2023, Open Philanthropy made a three-year \$300 million commitment to GiveWell (see this [blog post](#) for more details). We have allocated \$100 million of that commitment for 2023. Of this \$100 million, \$57 million was directed to organizations and programs other than our Top Charities, and about \$2 million was allocated to GiveWell operating expenses. An additional approximately \$34 million (34%) was allocated to specific organizations as contingency funds, which will be paid out only if certain conditions in our grant agreements are met (if the conditions are not met, the funds will be reallocated for other grantmaking). About \$7 million remaining from the \$100 million allotment for 2023, along with about \$146 million remaining from Open Philanthropy's earlier commitments, has not yet been directed.¹⁶

¹⁶ See the table on p. 9 of [GiveWell Metrics Report – 2022 Annual Review](#). We expect to identify more cost-effective, high-impact giving opportunities than we can fully fund this year and in coming years; because we

Open Philanthropy 2023 Funding Commitment	Amount	Portion of Total
Funds directed to GiveWell-recommended programs	\$91,058,765	91%
Funding directed to Top Charities	\$0	0%
Funding directed to other programs	\$56,716,358	57%
Contingency funds (not yet directed)	\$34,342,407	34%
GiveWell operations	\$1,785,296	2%
Funds not yet directed	\$7,155,939	7%
Total	\$100,000,000	100%

GiveWell's operations

Our operating expenses have grown from around \$4 million in 2015 to \$19 million in 2023, providing us more capacity; our researchers now spend over 50,000 hours each year conducting in-depth evaluations of cost-effective programs. See the table below for how our expenses break down across staff and contractors, administrative costs, and outreach costs.

Operating costs breakdown	2017	2018	2019	2020	2021	2022	2023
Administrative costs ¹⁷	\$2,209,474	\$1,327,323	\$1,774,779	\$1,899,779	\$2,869,394	\$3,017,512	\$4,597,387
Outreach ¹⁸	\$242,872	\$577,953	\$364,493	\$1,028,945	\$2,118,049	\$1,862,257	\$2,123,372
Staff and contractors	\$2,949,508	\$2,674,775	\$3,890,001	\$5,758,041	\$6,328,027	\$9,286,956	\$12,110,758
Total operating cost	\$5,401,854	\$4,580,051	\$6,029,273	\$8,686,765	\$11,315,469	\$14,166,724	\$18,831,517

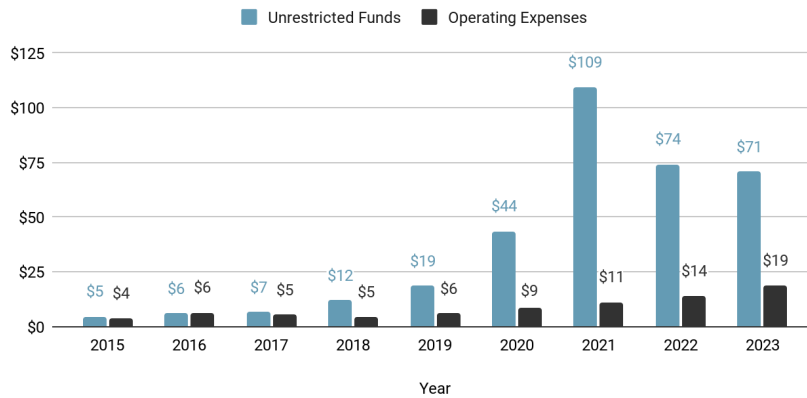

Our unrestricted funds raised have grown from around \$5 million in 2015 to \$71 million in 2023, much more quickly than our operating expenses. We've historically used unrestricted funds primarily to support our operations, though per our ["excess assets" policy](#), we grant out unrestricted funds that exceed the amount we think we could productively use. Additionally, we sometimes receive large unrestricted donations that exceed the 20% cap we place on operations support from any single donor, and in those cases we may choose to grant out the excess funds or to reserve some portion of that donation to fund 20% of our operations in a future year. (For more information, see this [blog post](#).)

are uncertain about how much money we'll raise each year and anticipated that funding from Open Philanthropy would be lower in the future, we did not expend all of its funds last year to ensure that funding is available for the most cost-effective opportunities we find in future years (for more information, see this [blog post](#)).

¹⁷ This includes costs for audit, insurance, legal, supplies, staff recruitment, staff cohesion, travel, and rent.

¹⁸ This includes costs for advertising, donor events, website hosting and developer fees, and PR firms.

Unrestricted Funds vs. Operating Expenses (in \$millions) by year

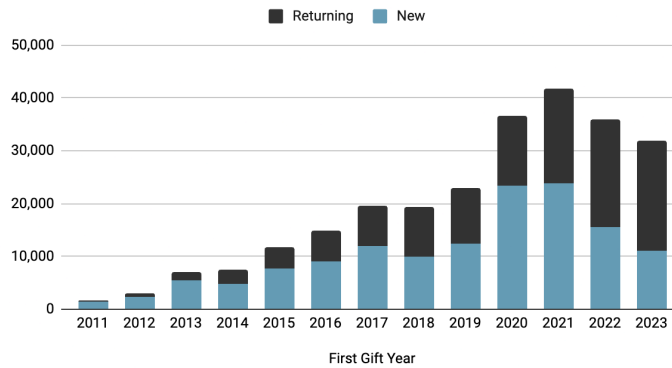

Donor information

New, returning, and anonymous donors

While the number of new donors decreased in 2023 compared to 2022 and 2021, retention among existing donors remains steady. In addition, in 2023 the total amount donated by existing donors increased.¹⁹

Number of New and Returning Donors by Year

Donor Category	2022	2023	Y/Y growth
New	\$41,187,638	\$20,459,166	-50%
Returning	\$172,662,646	\$195,287,701	13%
Anonymous ²⁰	\$42,952,252	\$39,322,987	-8%
Total	\$256,802,536	\$255,069,854	-1%

¹⁹ Note that we do not have clear data on the number of anonymous donors from year to year.

²⁰ This includes donors for whom we have no identifying information, including those who donated cryptocurrency and those who donated directly to our Top Charities. See the definition in the [glossary](#).

Funding by donor size

In 2023, we saw a slight increase in total funding donated by donors giving more than \$10,000, and decreases in the total funding donated by donors giving less than \$10,000. We saw an increase in the number of donors giving between \$10,000 and \$999,999, and decreases in the number of donors giving other amounts. (The figures below exclude donations from Open Philanthropy.) Note that the information we have about direct-to-charity donations is less granular and lower quality than our data on donations through GiveWell.²¹

Donations through GiveWell by Donor Size				
Donor Size	2020	2021	2022	2023
\$0 - \$99	\$368,894	\$389,826	\$298,568	\$250,793
\$100 - \$999	\$4,968,822	\$6,887,502	\$6,067,009	\$5,375,808
\$1,000 - \$9,999	\$16,371,236	\$24,162,442	\$23,736,519	\$21,095,643
\$10,000 - \$99,999	\$22,035,494	\$31,969,170	\$30,223,996	\$32,138,578
\$100,000 - \$999,999	\$18,669,595	\$31,318,902	\$22,640,085	\$27,782,587
\$1,000,000+	\$46,424,289	\$113,078,465	\$114,481,046	\$117,320,066
Anonymous	\$3,658,281	\$8,630,779	\$7,207,653	\$9,925,012
Total	\$112,496,610	\$216,437,087	\$204,654,876	\$213,888,487

Donor Count for Donations through GiveWell by Donor Size (excluding Anonymous Donors)				
Donor Size	2020	2021	2022	2023
\$0 - \$99	13,088	9,683	7,755	6,801
\$100 - \$999	16,397	21,274	17,749	15,518
\$1,000 - \$9,999	6,134	9,290	8,977	7,999
\$10,000 - \$99,999	1,005	1,455	1,401	1,435
\$100,000 - \$999,999	90	142	116	137
\$1,000,000+	10	18	22	20
Total	36,724	41,862	36,020	31,910

²¹ For more information on our data sources for direct-to-charity donations, see the entry in our [glossary](#). For estimates of direct-to-charity donations by donor size, see [this table](#) in our accompanying spreadsheet.

Appendix

Glossary

Anonymous donors

Donors for whom we have no identifying information, including those who donated cryptocurrency and those who donated directly to our Top Charities.

Contingency funds

Funding that we allocated to our recommended charities but that may not ultimately be paid out. We sometimes recommend contingency funds as part of specific grant agreements. For example, we may recommend contingency funds be paid out to a charity in the case that program costs are higher than expected, or to help a charity scale down its program in the case that we don't wish to renew our grant. If all or a portion of contingency funds go unspent after the grant period has ended, they are returned to our budget for future grantmaking.

Direct to charity

Donations that were recommended or influenced by GiveWell, but provided directly to organizations instead of passing through GiveWell's bank account. Our totals on individual direct-to-charity donations include donation information we receive from our [donation report form](#) and from our Top Charities. We provide these numbers for transparency but do not consider them a reliable estimate of total individual donations made directly to organizations as a result of our recommendations.

Donations through GiveWell

Donations that were processed by GiveWell (i.e., passed directly through our bank account).

Donor-designated funds

Donations for which donors make the final decision on how to allocate funds, but which were still influenced by GiveWell's research and recommendations. For example, this would include a donation from a donor who gave to the Against Malaria Foundation through our website.

Funds directed

The total amount of funding in a given metrics year that we directly recommended or spent (including operating expenses), as well as funding that we believe was influenced primarily by our research and recommendations.

Funds not yet directed

Funding that we raised in a particular year but did not allocate in that year.

Funds raised

The total amount of funding we raised in a given metrics year, regardless of the funding we directed in that year. This includes donations to GiveWell or through GiveWell, as well as donations made directly to organizations as a result of our recommendation.

GiveWell-recommended funds

Donations that GiveWell decides how to allocate. This includes:

- donations to the [Top Charities Fund](#), which we allocate quarterly to the highest priority funding needs among our [Top Charities](#).
- donations to the [All Grants Fund](#), which we allocate to any grant that meets our cost-effectiveness bar, including funding opportunities outside our Top Charities.
- donations to our [Unrestricted Fund](#), which can be allocated to any GiveWell priority, including grantmaking and our own operating expenses.
- grants we recommend that other funders make. The vast majority of this funding comes from Open Philanthropy (see [here](#)), which generally disburses the funding directly to the organizations we recommend. Note, however, that Open Philanthropy retains the discretion to approve or reject grants. We also recommend grants to other funders, such as the [EA Global Health and Development Fund](#) and groups that operate funds similar to our Top Charities Fund and seek our input on how to allocate donations to those funds.

This category excludes donations to GiveWell that are designated for a specific program, as well as donations directly to charities that are influenced by GiveWell's top charity recommendations but are not based on a specific recommendation from us directly to the donor.

Metrics year

The period from February 1 to January 31. Unless otherwise indicated, this report covers funds that were raised and funds that were directed during our metrics year. For 2023, that means the donations we report as "funds raised," for example, were provided to us between February 1, 2023, and January 31, 2024. We have reported this way since 2012 because donations tend to be clustered in late December and early January, so this provides a more accurate picture of annual growth.

Money moved

Prior to 2020, we used "money moved" rather than "funds raised" and "funds directed." Money moved refers to the total amount of money donated to organizations that we believed we influenced in a given metrics year. In most but not all cases, this means money moved was equivalent to the funds that were both raised and directed in a specific year. In the past, GiveWell-recommended funds raised in one year but granted in the next were counted as money moved in the year the funds were raised. In some cases, unrestricted donations granted out to organizations were counted as money moved in the year the funds were granted out and deducted from money moved in the year the funds were raised. Due to difficulties in generating

money moved figures and ensuring consistency across years, we no longer report on this metric—instead reporting separately on funds raised and funds directed.

Tables

See our [accompanying spreadsheet](#) for a complete set of tables compiling our metrics, many of which have been reproduced in this report. This includes the following:

- [2023 Funds Raised and Directed summary](#)
- [Funds Directed summary \(2012–2023\)](#)
- [Funds Raised by funding source \(2012–2023\)](#)
- [Funds Raised by funding type \(2012–2023\)](#)
- [2023 Funds Directed](#)
- [GiveWell operating expenses \(2015–2023\)](#)
- [New vs. returning donors \(2010–2023\)](#)
- [Funds Raised by donor size \(2019–2023\)](#)
- [Money Moved by organization, program, and source \(historic\)](#)

Organizations and programs supported by GiveWell in 2023

The table below provides information about funds directed by recipient organization and program.

Funds Directed to Recipient Organization, including Source of Funding				
Organization + Program	Open Philanthropy	Other Donors	Total	%
Evidence Action - in-line chlorination India	\$37,623,540	\$2,209,970	\$39,833,510	20%
Against Malaria Foundation - ITNs (Top Charity)	\$0	\$32,323,614	\$32,323,614	16%
Malaria Consortium - SMC (Top Charity)	\$0	\$27,155,899	\$27,155,899	14%
New Incentives - CCTs for immunization (Top Charity)	\$0	\$24,748,486	\$24,748,486	13%
Helen Keller International - VAS (Top Charity)	\$0	\$17,934,581	\$17,934,581	9%
Clinton Health Access Initiative - ORS/Zinc distribution	\$0	\$7,773,651	\$7,773,651	4%
International Rescue Committee - acute malnutrition treatment	\$7,485,323	\$0	\$7,485,323	4%
Evidence Action - safe water scoping	\$4,616,003	\$1,773,040	\$6,389,043	3%
Nutrition International - VAS	\$0	\$5,977,851	\$5,977,851	3%
Sightsavers - Deworming	\$0	\$5,772,073	\$5,772,073	3%

IRD Global - org. development support	\$5,399,805	\$0	\$5,399,805	3%
Suvita - SMS & ambassadors for immunization	\$0	\$3,305,079	\$3,305,079	2%
IRD Global - extension of mCCT & EIR	\$0	\$2,712,552	\$2,712,552	1%
PATH - study of PMC + RTS,S	\$1,591,687	\$0	\$1,591,687	1%
Unlimit Health - Deworming	\$0	\$1,495,745	\$1,495,745	1%
Malaria Consortium - codelivery of VAS & SMC	\$0	\$1,440,000	\$1,440,000	1%
University of Chicago - water quality research	\$0	\$895,999	\$895,999	0%
PATH - bridge grant for malaria vaccine TA	\$0	\$838,000	\$838,000	0%
University of California, Berkeley - research seed funding	\$0	\$787,500	\$787,500	0%
Malengo - migration scholarship program	\$0	\$750,000	\$750,000	0%
IRD Global - zero TB program exit	\$0	\$736,000	\$736,000	0%
Precision Development (PxD) - Agricultural education	\$0	\$700,000	\$700,000	0%
MiracleFeet - monitoring of clubfoot program	\$0	\$596,000	\$596,000	0%
Family Empowerment Media - family planning radio messaging	\$0	\$500,000	\$500,000	0%
One Acre Fund - top-up for RCT	\$0	\$185,199	\$185,199	0%
Evidence Action - IFA coverage surveys	\$0	\$97,000	\$97,000	0%
Dimagi - scoping for CommCare Connect	\$0	\$49,722	\$49,722	0%
Grand Total	\$56,716,358	\$140,757,961	\$197,474,318	100%

The table below provides information about funds directed by program.

Funds Disbursed by Program, including Source of Funding				
Program	Open Philanthropy	Other Donors	Total	%
Water quality interventions (in-line chlorination, chlorine dispensers)	\$42,239,543	\$4,879,009	\$47,118,551	24%
Insecticide-treated nets	\$0	\$32,323,614	\$32,323,614	16%
Promoting immunization	\$0	\$30,766,117	\$30,766,117	16%
Seasonal malaria chemoprevention	\$0	\$27,155,899	\$27,155,899	14%
Vitamin A supplementation	\$0	\$23,912,432	\$23,912,432	12%
ORS/zinc distribution	\$0	\$7,773,651	\$7,773,651	4%
Acute malnutrition treatment	\$7,485,323	\$0	\$7,485,323	4%
Deworming	\$0	\$7,267,818	\$7,267,818	4%

Org. development support for IRD Global	\$5,399,805	\$0	\$5,399,805	3%
Research on perennial malaria chemoprevention and RTS,S vaccine	\$1,591,687	\$0	\$1,591,687	1%
Codelivery of vitamin A supplementation with seasonal malaria chemoprevention	\$0	\$1,440,000	\$1,440,000	1%
Malaria vaccine	\$0	\$838,000	\$838,000	0%
Global development research	\$0	\$787,500	\$787,500	0%
Scholarship program for international migration	\$0	\$750,000	\$750,000	0%
Tuberculosis screening and treatment	\$0	\$736,000	\$736,000	0%
Agricultural advice	\$0	\$700,000	\$700,000	0%
Clubfoot treatment	\$0	\$596,000	\$596,000	0%
Family planning radio messaging	\$0	\$500,000	\$500,000	0%
Tree seedlings for farmers	\$0	\$185,199	\$185,199	0%
Iron and folic acid fortification	\$0	\$97,000	\$97,000	0%
CommCare Connect	\$0	\$49,722	\$49,722	0%
Grand Total	\$56,716,358	\$140,757,961	\$197,474,318	100%
